

ALL UNDER ONE ROOF

This established clinic offers such a wide range of treatments for the face and body, catering to every beauty need you have.

As early as 2005 when aesthetics treatments weren't as commonplace as they are these days, Uber-Aesthetic Clinic started its operations.

Today, its most popular treatments are Cryolipolysis, which uses a cool-sculpting method to reduce body fat, Nd YAG Laser which targets skin pigmentation, fillers and also the Sculptra non-surgical facelift.

The clinic's face treatments include more basic ones for enlarged pores and oily skin and targeted procedures for conditions like Hori's Macule, a form of bluish-grey pigmentation. Other treatments offered here comprise botox, blue and red LED light procedures, fractional laser peels and fractional laser resurfacing.

And don't think that you'll be needing only these after a certain age. One interesting program that Uber-Aesthetics Clinic offers is its Prevent Program. At \$2,000 you get six sessions of laser peels and six sessions of Renewal Masks. This is a preventative programme for younger skin that has undergone very little photo-ageing or for those of us who wish to eradicate the earliest signs of ageing before they worsen. After all, prevention is always better than cure, when it comes to looking good.

Uber-Aesthetic Clinic is at 30 Hill Street, #01-03A (tel: 6883-2218)
